# Level Up Your Communication

Welcome to the next step in building strong English skills for the modern tech world. This course is designed for learners who have mastered the basics and are ready to move beyond simple sentences.
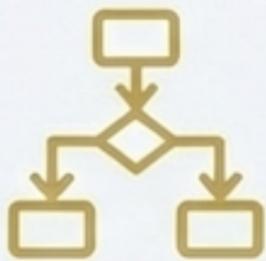

`Accuracy` » `Confidence` » `Fluency`

# The Operating System of Innovation

In the global tech environment, English is the kernel that connects every process.

**Documentation:** Reading manuals & writing guides.

**Collaboration:** Stand-ups, chats, & debugging reports.

**English in Tech**

**Development:** Software discussions & product specs.

**Innovation:** AI prompting & online learning.

# Practical. Structured. Tech-Focused.

## Input: Step-by-Step Learning

Master grammar forms, meanings, and usage in a clear, logical sequence.

## Process: Applied Context

Understand how grammar improves clarity in coding comments, project work, and teamwork.

## Output: Real-World Practice

Exercises linked to Python tasks, software development, technical writing, and AI prompting.

# What You Will Achieve

- ☑ Strengthen understanding of intermediate grammar structures.

- ☑ Write clearer, more accurate sentences for technical contexts.

- ☑ Ask effective questions in debugging sessions and meetings.

- ☑ Explain processes and compare technical tools with confidence.

- ☑ Improve specific coding communication (comments, issue reports).

- ☑ Prepare for global collaboration and professional work.

# System Requirements

## Language Stack

- Basic foundation in English grammar.
- Completion of 'English for Technology – Beginners' (or equivalent).
- Familiarity with present, past, and future forms.

## Tech Stack

- No advanced programming knowledge required.
- Interest in Python, software development, or AI tools.
- Willingness to practice English in tech scenarios.

**Hardware Required:** Notebook/Device 📔 + Access to **pythonplayground.org** 🪟

# Syllabus: Core Structures (Part I)

```
01: Present Time (Review & Expansion)
02: Past Time
03: Future Time
04: The Present Perfect & Past Perfect
05: Asking Questions (Crucial for debugging!)
06: Nouns & Pronouns
07: Modal Auxiliaries
08: Connecting Ideas >_
```

# Syllabus: Advanced Expressions (Part II)

# Who This Course Is For

**Python Learners**

**Tech Students**

**Future Developers**

**AI & Prompt Learners**

And any team member seeking better communication skills.

# Start Your Journey

This course is the bridge between basic grammar and advanced technical communication. Grow your English fluency and your technology confidence.
